Table of contents

- Do you think that the detection of the problems and solutions for the stay of young people in rural areas should be given a priority in planning documents, eg local development strategy or development strategy of rural municipalities?
- Do you think that greater financial incentives for entrepreneurship in rural areas would stop emigration and encourage the opposite trend - the return of young families from urban areas or from abroad back to rural areas?
- Which measures do you think would stop the trend of emigration of young people from rural areas (you can choose up to 3 answers):
- Which model of the nation state or the European Union you think would give a better and faster result in terms of retaining and returning young people to rural areas?
- Do you support the settlement and integration of economical and political emigrants?
- How satisfied you are with the overall work at the 4th event?

Do you think that the detection of the problems and solutions for the stay of young people in rural areas should be given a priority in planning documents, eg local development strategy or development strategy of rural municipalities?
